

THE STATE UNIVESIRTY OF ZANZIBAR

SCHOOL OF COMPUTING COMMUNICATION AND MEDIA STUDIES

DEPARTMENT OF COMPUTER SCIENCE AND INFORMATION TECHNOLOGY

COURSE TITLE: HUMAN RESOURCE MANAGEMENT AND INFORMATION SYSTEM

COURSE CODE: INF 3108

LECTURER: DR. ASHURA

TYPE OF WORK: GROUP

GROUP MEMBER:

FULL NAME	REGISTRATION NUMBER
WADH-HA ZAHOR SAID	BITAM/11/23/031/TZ
MARYAM OMAR AHMED	BITAM/11/23/091/TZ
MARYAM JUMA ADIB	BITAM/11/23/087/TZ

EMPLOYEE FILE DATA ITEMS IN A PERSONNEL INFORMATION SYSTEM (HRIS/PIS)

A Personnel Information System (PIS), also known as a Human Resource Information System (HRIS), is a computerized system used to collect, store, manage, and process employee-related information within an organization. It supports key human resource functions such as recruitment, payroll processing, performance management, and compliance with legal and organizational requirements.

At the center of this system is the Employee File, which acts as the master record for each employee. It contains all essential personal, employment, financial, and performance-related information. Proper design of the Employee File is critical because it ensures data accuracy, security, and efficiency in HR operations.

The following outlines the key data items that make up an Employee File, grouped into logical categories for clarity and effective system design.

1. Employee File Data Items

Employee data is organized into structured categories to support efficient storage, retrieval, and management.

2 Employee Identification Details

This section contains basic information used to uniquely identify each employee in the system.

Employee ID (unique system identifier)

Full name (first, middle, and surname)

National Identification Number (e.g., NIDA or equivalent)

Passport number (if applicable)

Date of birth

Gender

Marital status

3 Contact Information

This section contains details used to contact the employee or their emergency contacts.

Personal email address

Work email address

Phone number(s)

Current residential address

Permanent home address

Emergency contact name

Emergency contact relationship

Emergency contact phone number

4 Employment Information

This section describes the employee's job position and work relationship with the organization.

Date of hire

Employment type (full-time, part-time, contract, probation, casual)

Job title or position

Department

Job grade or salary level

Supervisor or manager ID

Work location or branch

Date of termination (if applicable)

Reason for leaving (if applicable)

5 Payroll and Financial Information

This section contains sensitive financial data used for salary processing and statutory deductions.

Basic salary

Bank name

Bank account number

Bank branch details

Tax Identification Number (TIN)

Social security or pension fund number

Allowances (e.g., housing, transport, medical)

Deductions (e.g., loans, insurance, union fees)

6 Education and Skills Information

This section captures academic qualifications and professional competencies of the employee.

Highest level of education

Field of study or specialization

Professional certifications

Key technical and soft skills

Languages spoken

7 Performance and HR Records

This section tracks employee performance, attendance, and development over time.

Attendance records

Leave balances (annual, sick, maternity, etc.)

Performance appraisal ratings

Training and development history

Disciplinary records (if any)

8 Data Security and Access Control

Employee files contain highly sensitive personal and financial information. Therefore, strong data protection measures must be implemented within the HRIS/PIS. One key method is Role-Based Access Control (RBAC), where access to information is granted based on job roles.

For example, HR officers may access full employee records, while line managers may only access performance-related data. Payroll staff may access salary information but not disciplinary records. This ensures confidentiality, data integrity, and compliance with data protection principles.

CONCLUSION

The Employee File is a core component of an HRIS/PIS. It ensures that employee information is well organized, secure, and easily accessible for HR processes such as payroll, recruitment, and performance management.
